Round Table Meeting with BENAKI Wetlab

Successful Round Table Meeting in Berlin with Benaki Wetlab

On 1st of September our Round Table Meeting took place in Berlin. We were very honoured to welcome very experienced users but also interested surgeons from all over Europe. The main topic was the safe and reliable use of our Matrix Patch in different applications mainly in congenital cardiac surgery. Clinical outcomes with the equine Matrix Patch were presented and vividly discussed among the participants.

PD Dr. Jaroslav Benedik is leading surgeon at the Cardiac Centre at Helios Clinic in Krefeld. Three years ago he started with the neo-cuspidization

according to prof. Shigeyuki Ozaki from Japan. Dr. Benedik soon started the procedure in Germany and other European Countries. He refined his method by using resterilizable Fehling Sizers and the Asanus Trifit. As a sign for his respect for prof. Ozaki he called his procedure BENAKI. He teaches this method at the BENAKI School in Krefeld. For more information on training options please follow this link: <https://www.helios-gesundheit.de/kliniken/krefeld/unser-angebot/fachbereiche/herzchirurgie-herzzentrum-niederrhein/ozaki-operation/>
